E-shop check · 18 November 2026

https://jusu-imone.lt/

We read 6 public pages: home, products, terms, contact. Each item names the rule we read it against.

To fix	Partly / check	OK or not applicable
2	4	2

Withdrawal function — Partly

Lithuanian Civil Code art. 6.228¹⁰(11–16), from 19 Jun 2026

There is a link, but it does not lead to a form or needs a login.

What to do: Add an always-visible "Withdraw from the contract here" link to a short form (order number, email) and send a confirmation email at once.

Legal guarantee notice — OK

Implementing Regulation (EU) 2025/1960, from 27 Sep 2026

The legal guarantee of conformity notice was found.

Product safety details — Partly

General Product Safety Regulation (EU) 2023/988, art. 19

Some details are there, but not on every page we checked.

What to do: Show the manufacturer and its address, the EU responsible person (if made outside the EU), a product identifier and safety warnings on every product page.

Discount prices — Fix

Directive 98/6/EC art. 6a (lowest price in 30 days)

Discounts do not state the lowest price of the last 30 days.

What to do: Show the lowest price of the 30 days before the discount next to every discount.

Seller details — OK

Civil Code art. 6.228⁴; Information Society Services Law art. 5

Name, code, address, email and phone were found.

AI chatbot disclosure — Check yourself

AI Act art. 50(1), from 2 Aug 2026

A chat widget was found. What it says first cannot be read from the page – check that people are told they are talking to AI.

What to do: Make the bot's first message say, for example: "I'm an AI assistant. You can ask for a person at any time."

Tracking before consent — Fix

Electronic Communications Law art. 61; ePrivacy Directive art. 5(3)

Tracking code loads with no consent tool – it runs before the visitor chooses.

What to do: Add a consent tool and load tracking only after consent (or Google Consent Mode defaulting to "denied").

Accessibility basics — Partly

European Accessibility Act, EN 301 549. Microenterprises providing services are exempt.

A few basic errors were found.

What to do: Add alt text to images, labels to fields and buttons, a language tag, and do not block zoom. An automatic check is not a full WCAG review.
